

SOME PEDESTRIANS

BLACKBIRD OUT ON I FOR US RECORDS

Some Pedestrians is a Post-Hardcore band with a tech-metal edge hailing from Ninove (Belgium). Formed in the early winter of 2007, Some Pedestrians are 5 individuals with one main thing in common: A love for intense and passionate music.

Some Pedestrians has known a few line-up changes in the past like almost every band, but the band as we know it today is formed by Jurgen Sergeant (vocals) Maarten De Bisschop (guitar) Maxime Deschamps (guitar) Branko Capla (bass) and Thomas De Geyseleer (drums)

The band is oftenly described as a crossover between bands like Poison The Well, Mastodon, Norma Jean, Gojira, ... all mixed down with some The Dillinger Escape Plan influences. After every live show they also get complimented on their very passionate, powerfull and intense performance

Throughout their relatively short period of existence, Some Pedestrians has already done numerous gigs in Belgian venues.

Apart from that they also played a couple of shows in The Netherlands and toured the UK. They are always on the lookout for shows and hope to get the chance to perform alot more in the future .

Their goal is not to get rich but to get their name, Some Pedestrians, out there just like their music and to have an unforgettable time in the process.
