KEN POIRÉ (GUITAR), **ÄNDER MILLIM** (DRUMS),

LUCA TOMMASI (VOCALS), **ROL FLIES** (BASS),

MARC GEIBEN (GUITAR)

BIOGRAPHY

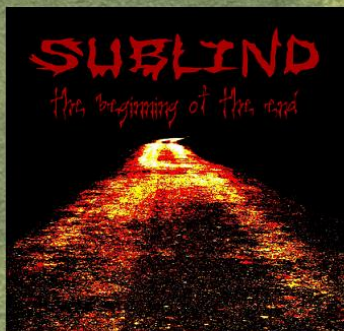

Sublind is a thrash metal band from Luxembourg which was founded in late 2005/early 2006 by four teenagers.

After many concerts in all these years and a few line-up changes so far, the band is today composed by Luca Tommasi (v), Ken Poiré (g), Marc Geiben (g), Roland Flies (b) and André Millim (d). Combining fast and thrashy riffs with scratchy growls, the band sounds oldschool and unique. The approach to thrash metal is even recognizable in the (partially) corny lyrics and in the band's general attitude, as shown on all records they released.

The merciless and sweaty live shows are full of energy, in which the band intends to include the audience with their clear-cutted choruses and a constant interaction with the fans. A long-standing live experience and tremendous fun with some liters of beer are guaranteed. Sublind has shared all kinds of stages and plays especially in clubs or small metal festivals in Luxembourg and abroad. So far, they already had the opportunity to share bigger stages with international bands like Death Angel, Tankard, Warbringer, Satyricon, Dust Bolt, Eyehategod, Alestorm, Carach Angren, and many local heroes. In Luxembourg, nearly all major events have been played so far but still the bands stays hungry for more!

The greatest influences for the band are especially thrash metal bands from the eighties and nineties.
