

HEARTFIELD

Heartfield - a band created by a guitarist, vocalist and songwriter Jakub Sedlak. After finishing his jazz guitar degree in Prague, Czech Republic, he decided to leave the role of a sideman in various commercial projects and make the step towards his own music career. After moving to Berlin in 2014, inspired by the bands like Pink Floyd, Dream Theater or Steven Wilson, Jakub composed his first songs that would eventually become his main focus – Heartfield.

„Life is a huge field of different emotions, feelings and experiences. And the same with music. Heartfield is a place where I can put together all the moments that somehow got stuck on my heart” says Jakub. Therefore the songs range from sad, gloomy ballads and melancholic moods to a solid rock attitude and raw metal. *„I like to write very personal lyrics about things that made me stop and think. Or maybe look back again and see what they were actually supposed to tell me about myself. Like human communication, social life, relationships, life values, different perspectives, opinions and of course love. And hate. Most people can relate to such topics, it's just everyday life with it's ups und downs. And I try to put those sometimes even subtle feelings into words.”*

Heartfield's music has a strong emphasis on melody, supported by heavy guitar riffs and surrounded by a wall of wide synths. The songs are complex, mostly longer, very emotional, with unusual harmony and rhythm changes that will hold the listener's attention till the end. Or maybe play the track again.

Now in 2018 the band based in western Germany is bringing out the first EP “Follow” including four tracks. The musicians are about to hit the stage in the following line-up:

Jakub Sedlak – Guitar, Vocals
Nicolai Stenzel – Bass
Dominik Targonski – Keyboards
Marlon Schäfer – Drums
