## STAR

STAR, the authentic rock band with influences of old school Hard Rock and Sleaze Rock present their first CD "Roll over you". With the three full-blooded musicians the energetic guitar is always in the spotlight and is supported by the heavy bass and the powerful drums. STAR presents with this minimal instrumentation, maximum live power!

Spike (guitar/vocals), Tommy (drums) and Richi (bass) have decided to start a new band project in 2016. After many years of successfully rocking many well known stages and locations in Germany with cover band projects, they decided it was time to do something new and different.

The friends and musicians, living in the surrounding of Frankfurt/Germany, had written lots of songs in the past years. Some of them had been waiting for a long time to get recorded and being played live. Finally the band STAR reworked and remanaged a part of the song material and they are now proud to present their first opus with the release of the 12 track CD „Roll over you“

...and there is still more to come... at the moment STAR returned for recording sessions for the next CD release in 2021 - stay curious and keep rockin‘.
