

NOVI

Novi (aka Novi Music) is a band based in Munich, Germany. Their sound blend is refreshing, diverse, yet familiar and inspiring. Novi's music blurs the lines between funk, pop, soul and electro elements, tipping the hat to legendary artists such as Jamiroquai, Prince, Daft Punk, and Giorgio Moroder, only to mention a few.

The foundation of Novi Music are the singer Mishell Ivon and bass player Basti Braun, working on a project together they realised they shared many musical commonalities so they decided to do some songwriting to see where it would lead. With that being said "Novi Music" came to life late 2016 and has steadily been moving forward since.

Novi's music tone is described as colourful, spontaneous and direct, by allowing themselves free range and promising to only make music that they would actually enjoy listening to Novi wound up on a journey of discovery pulling from their inspirations and creating new ones.. Simply put, this was the road map to their now distinctive style.

German/ American Mishell Ivon grew up in a musical household where it very quickly became clear that music would be a focus in her life. She was discovered by Felix Weber and Irmgard Klarmann at an early age and together with this production duo shared several releases in Japan and one in the UK. The singer/songwriter has also worked on various studio/band projects, tours and commercial work.

Basti Braun is a seasoned bass player, talented composer and now also producer taking part of Novi's production into his hands. Braun studied music in Regensburg and has also toured throughout Germany and United States with different band set ups
