

BRUNHILDE

technical rider

PA:

The PA-System must meet the requirements of the venue regarding it's dimensions.

An undistorted level of 118 db/SPL **must** be guaranteed at all times without compression or limiting.

The Band's soundengineer must have access to all components of the system and it's controlling.

Preferable systems: L-Acoustics, d+b audiotechnik, EAW etc.

FOH:

Brunhilde carries their own desk (MIDAS PRO1) for FOH and monitors.

The console can be shared with other act's, if requested in advance (requests on showday will not be accepted!).

If an existing system has to be added, an analogue XLR split with min.40 channels will be needed.

For festivals we will need 3 separate CAT5E lines from FOH to the stage.

Monitoring + Stage:

BRUNHILDE carries their own IEM and mics.

additional requirements:

2 powerful sidefills (3-way active) meeting the size of the stage

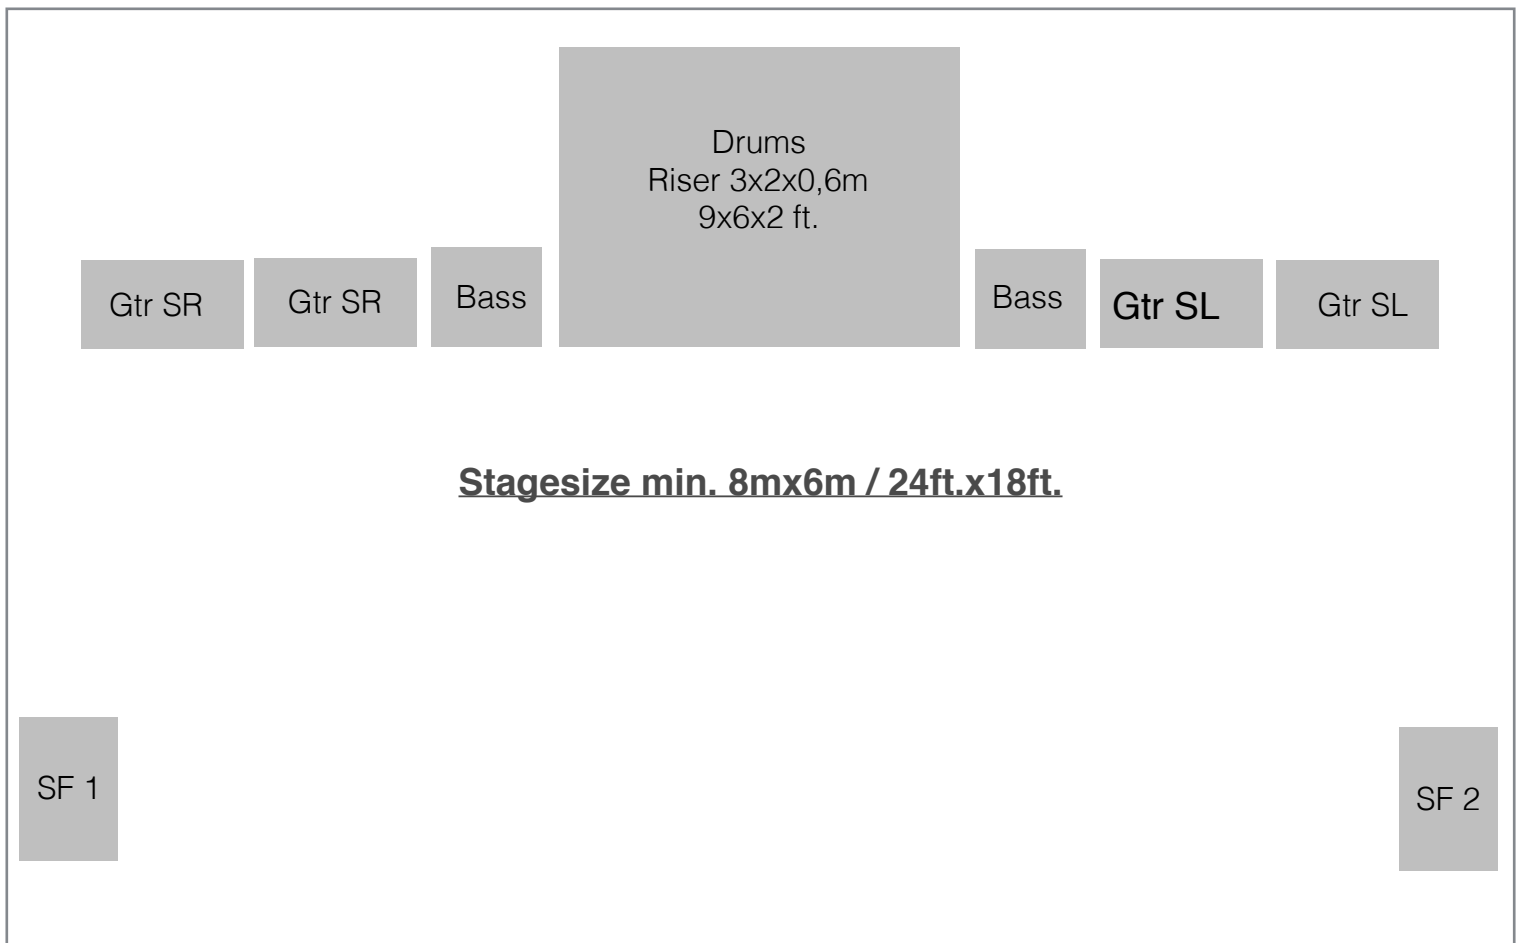

40 x mic-cables 3m/5m/7m or 9ft/15ft/21ft

5 x micstand with large boom

9 x micstand with small boom

1 x micstand straight
