The Melodic Rock newcomer DeVicious is an ambitious rock band based out of Germany with an international musician line-up. The debut album "Never Say Never" has just been released on March 16, 2018 on the rock label The Junction.

The band emerged in 2016, when long time musician friends from Karlsruhe Germany sat down together and talked about the golden 80s of the past millennium. While reminiscing the days when bands like Bon Jovi, Van Halen, Europe, Journey, Def Leppard and Scorpions were heading the charts, the founding members of DeVicious felt the urge to put their own testimony together that would combine their love for music and influence of idols as well as their experience with live performances, studio and recording experience with Andy Deris Band, Chryztye and Zar.

With great enthusiasm and paired with the advantages of modern studio technology the idea of DeVicious had been finally realized. The hooks and arrangements of the debut album "Never Say Never" are up to par with international aspiration. This is also well reflected in the band's professional music videos. Both singles, "Everything" and "Penthouse Floor" had been already released earlier this year.

The six piece band consists of songwriter, producer and bassist Alex Frey, lead guitarist Radivoj Petrovic, rhythm guitarist Gisbert Royder, keyboardist Denis Kunz, drummer Lars Nippa and Serbian singer Zoran Sadorov aka Mister Sanders. DeVicious will debut its live presence in March 2018 – together as special guests with the bands Xtasy and the Scandinavian all-star rock band Ammunition. DeVicious is also planning on touring again through Germany in December this year with Xtasy and the legendary US rock band Hardline.
