The Deconstruction Of Light by Electric Mud

📅 May 24, 2018 👤 oasisentertainmentblog

For my 791st review, I decided to do a third review for the German rock band **Electric Mud**. The title is **The Deconstruction Of Light**, a progressive rock album released April 6, 2018, on the Timezone Records label. I enjoyed this album as much as I did the last two I reviewed for them. Imagine early King Crimson jammed together with Tangerine Dream and Cluster when you listen to this album along with a little Pink Floyd and you get Electric Mud with instrumental tracks as **Black Dog, Heads In Beds, Moongarden** and much more. This album was well written, recorded, produced and performed. If you are into electronica progressive rock, will definitely like this one. Take a listen to this album on Spotify and you can purchase this album from Amazon, Bandcamp, Itunes and everywhere that CD's and digital downloads are sold.
