If not declared otherwise, we bring two" large diaphragm microphones" that we work with. Vocals, guitar and any sort of percussion will be picked up by the mics. If the venue is very loud and echoes a lot, a DI box for the guitar will be needed.

On stage:

- Two stable barstools with footrests that do not creak or produce any other noise.
- A small and presentable table, that goes with the stools (for picks, drinks etc.)
- Two microphone stands
- Two XLR cables
- Still water (glass bottle and two glasses)

Monitoring:

- Often not necessary
- Good to have two side fills prepared if needed

Sound:

- pure acoustic sound
- just a bit of reverb, no fancy effects needed

Light:

- less is more
- blue, violet, white
- magic, natural, organic
