

sonoras mil

SOUNDS

Sonoras Mil's music can be initially defined as "tropical-experimental pop with a lot of groove", evoking sounds from different parts of the world. However, beyond labels, Sonoras Mil is a musical trip to places that do not exist but that are still familiar, almost intimate. Each song prompts encounters with fictional, naughty and nostalgic characters, who celebrate the mystery of being alive.

In Sonoras Mil's music you can find elements of funk, reggae, dub, rock, psychedelic cumbia, salsa, tribal, latin and electronica, all assembled in a pop and yet alternative format.

ALBUM

The first album of the same name, produced by the Grammy award music producer Christian Castagno (Iggy pop, Bomba Estéreo, Systema solar) in Minca, Colombia, came to the world in March 2015 and its digital and live release a few months later in June and September respectively.

PRIZES

AND RECOGNITIONS

Sonoras Mil's live show is intense and organic. Performing on stage with five musicians from the alternative music scene of Bogotá, the band blends the power of tropical percussion and drum beats with electro synths, dub-salsa bass lines, ambient - psychedelic guitars and sweet, catchy and hallucinating vocal harmonies. In this moment, **Sonoras Mil** is in the process of producing its second studio album to be released in May 2019.
