

After publishing a debut album (*My Darkest Hour*, 2011) rated best by famous music magazines like *RockHard* and winning the award *Deutscher Rock & Pop-Preis*, in 2016 BROACH further on successfully released their album *Fall To Rise*. Although the ambience wasn't as gloomy as in the first record dealing with death and break-ups, from a musical point of view the band remained true to itself. Basically, with its heavy guitar riffs and catchy vocal lines the second album sounds slightly more rounded. In addition to *Fall to Rise* the first two music videos were released: the title song already reached over 110.000 clicks by itself.

As can be seen at their live shows, the chemistry between the five guys from Southern Bavaria is right: besides delivering professional live-music they're full of passion and emotion. Appealing songs to sing along, tight & heavy drums, a driving bass and catchy guitar riffs in combination with the unmistakable voice of lead singer *Andreas Kofler* make the sound of BROACH truly unique. Songs like *Fall to Rise* or *So Close* know how to thrill their audience and put it in high spirits. However, tracks like *Broken* invite to sing along and make the overall picture perfect. The range is considerable and therefore the music addresses different target groups.

Touring with well-known bands like *Puddle of Mudd* the five band members always created the right impression - just as the click rates on various internet portals prove: the current album achieved clicks exceeding 5 Million on music streaming platforms as well as 600.000 on video streaming portals.

---
