Short description:

Let's get carried away by a 6-men joyful monkey crew that is fascinated by music. The strong base, which has been doing music for years brings you strong baselines and a solid amount of rhythm. Along with that is the sound of beautiful melodies and crispy lyrics by the three boys on the horns. Last but not least there's the distinctive voice of the lead singer, supported by a choir. Like this, the lyrics, that are mostly critical of society, become even more prominent and the message of a respectful community is conveyed to the very last row.

Be warmed by the flamy latin-influenced pieces, feel the lightness of reggae and offbeat, that runs like a golden thread through the tracks. Feel the firework when the rhythm gets faster and finally ends in ska-punk. Let the party begin!
