

Verderbnis

VERDERBNIS

Melodie Black Metal

Formed amidst the frigid shadows of a desolate forest in the heart of Germany in 2020, Verderbnis is a symphonic force that transcends the boundaries of darkness. Their sonic incantations draw listeners into a realm where melodic black metal meets the macabre depths of the human psyche.

THIS IS VERDERBNIS

The musical direction can only be roughly assigned to the early years of the 90s wave of Black Metal. Generally there are no reasons for musical chains that submit us to a general and obsessive genre or misses the traditional heritage and roots of the Black Metal genre. With Verderbnis you can expect an action-packed and diversified show, which gets you on a journey through aggressive fury and several epic moments. Progressivity and hypnotic monotony don't considered as a contradiction, but as an optional mean of expression and artistic freedom. Lyrics that are close to nature and pagan ideology as well as necromantic occult contents voiced by in the songs.
