

# DELIVER THE GALAXY

Modern Melodic Death Metal clashes with intergalactic conflicts. This sound supernova is what **Deliver The Galaxy** simply call **Sci-Fi-Metal**. Their full length releases follow the overarching narrative of the protagonist **Natham**. His quest leads him through the endless darkness of space to save humanity from the relentless alien army of **Sularis**.

On their shows **DTG** burn down the house in an acoustic firestorm. Drums like thunder and stomping riffs dripping with groove paired with daunting leadguitars and growls that are from another world.

Follow them on **The Journey** and receive their message:

**We are not alone!**
