**PESTEROUS MIND**

*„The world is on the edge, and we hold the musical mirror to her!“*

This is the motivation behind Pesterous Mind, gathered in October 2015, to offer you the musical apocalypse. And so the four friends (Sascha, Boogie, Andy, Phil) released their first 3-track demo in March 2016 and caused quite a stir. Already at these times the band knew how to decorate their Death Metal with different influences. Genre boundaries are not known by the 4 upper franconians. Even though they mix Thrash, Death, Black, Core, and Prog-Metal elements together, the guys have gained tremendous recognition and thus created their own genre.

This was then celebrated with the DIY release of their first full-length album "INFINITE ABYSS" in September 2017, which achieved top ratings nationally and internationally. This allowed them to gain a lot of live experience on big stages. The record label Boersma Records became aware of the band. Subsequently, in February 2018 a collaboration for the next album was announced.

**The album is called "Halluci.Nation" and will be released on 29.03.2019  
via Boersma- Records**
