### REVIEWS

„This is about you and the music, if you sit alone it will reward you with insights. If you are in a group don't talk, *let this brooding sonic palette paint a picture in your mind*, let it dredge the dark corners and reveal previously undiscovered recesses.“

„Their style is promising, enduring, solid and consistent, and the anguish provoked and emancipated by the afflictive expectancy generated by the agonizing behavior whimsically dilapidated by their sound is not only purposefully well designed, but majestically monumental as well.“
