

### - Press Information -

**Moore and More - a tribute to Gary Moore** is Germany's most successful and leading Gary Moore tribute band.

Featuring exceptional guitarist Bernd Kogler, the band fascinates every audience with its electrifying show. Played live by the four part band, their performance offers highest level rock and blues entertainment.

Audiences regularly are completely enthusiastic after the show.

The band got ennobled in August 2015, when guitarist Bernd Kogler acquired Gary Moore's very own The Heritage CM150 prototype guitar that he used during the 1989 / 1990 tours. Bernd uses it onstage again now.

This guitar can be seen on the 1990 Montreux DVD.

Since July 2016 Bernd even owns another one of Gary Moore's guitars: the one that became especially famous through the reknown Wikipedia photo: the *Gibson 1957 Les Paul Goldtop VOS Darkback Reissue*, to be seen and heard on the AVO Sessions from 2008.

Since January 2016 keyboard player and singer Frank Altpeter uses the instruments and original soundpatches, Neil Carter used on Gary Moore's last tour in Montreux 2010. The band is continuously supported by Neil Carter, original keyboard-player, guitarist and singer of the Gary Moore band during the rock era in the 1980s and in 2010. Thus the band is able to re-create the songs as close to the originals as possible.

**Moore and More** authentically re-create Gary Moore's manifold compositions as well as his virtuoso guitar work.

This earned the band high appreciation by rock and blues fans.

Their many concerts take place in clubs, halls and open airs and always find an enthusiastic audience.

**Moore and More's** extensive repertoire features all his hits like *Still Got The Blues*, *Walking By Myself*, *Parisienne Walkways*, *Friday On My Mind*, *Over The Hills And Far Away*, as well as numerous others from his 35-year career - but also less known titles from his time with *Colosseum II*, *Thin Lizzy*, the *Greg Lake Band* and *BBM*, that surely will electrify connoisseurs and fans.

The existing rock and blues sets are continuously expanded and varied.

Thus every gig is a new exciting experience.

This way **Moore and More** have been able to build up a devoted fan base, that follows their gigs.

### **The members of Moore and More are:**

**Bernd Koegler (guitars, vocals)** - the exceptional guitarist who lets Gary Moore resurrect - if you keep your eyes closed ;-)

At the same time he is the signboard of the band: no-one celebrates rock and blues the way he does it - now on Gary's very own guitar.

**Frank Altpeter (lead vocals, keyboards)** - the band's powerful voice, strong or sensitive and soft - just as it fits the song. At the same time he provides the manifold arrangements for Gary's multifaceted rock and blues titles, using the 2010 original sounds and instruments of Neil Carter.

**Reiner Heinzen (drums)** - looks back onto a decades long career in numerous bands. His heart beats for the blues - but if it comes to playing rock, he will lay a powerful basis to the band's rhythm section.

**Jochen Reinsberg (bass)** - well-trained in many bands loves and lives the groove. Together with Reiner Heinzen he delivers an inimitable impellent basis for Bernd's extraordinary guitar work.
