

# Veil of mist

Veil of Mist was founded in October 2004 in Reims (North-Eastern France). At the origin of the band forming is the long-standing collaboration between Frederic (guitar) and Jean-Baptiste (bass), which started in the band Dereliction in 1999 but when that band split up in 2001, nothing concrete could be done until they met Gautier (drums). Then the band started to rehearse during the fall 2004 with a female singer and a second guitarist who left the band a few months later. The band was set in full working order again from June 2005 when they were joined by Malou (vocals) who enabled them to put the final touches to their first songs. Four of them are available on the first demo of the band entitled "Industry of Guilt" released October, 25th, 2006. Since then, the band has been playing live as often as possible in France and abroad. They recorded three new songs in August 2007 among which two were put online by the end of the year. That is the "Dangling Hopes" demo that has been available on CD for sometime. Voiceless again for a few months in 2008, they were successively joined by three singers and two guitarists. In 2015 they started recording their first full length album **Disenchantment** with their new singer Amandine Rosselle, which will be release now in 2016.

In February 2016 the band signed with German label Valkyrie Rising. On Friday 13<sup>th</sup> in May 2016 the album will be released digital worldwide. The physical release with one bonus track will be a little bit later, starting in France, Belgium and the Netherlands.

The track 'Death in your Eyes' of the album is the first song given to several radio stations worldwide for air play.
