

Llana = 4 musicians based in Berlin +  $\frac{\text{punchy odd time signatures} + \text{captivating sound}}{\sqrt{\text{jazzy influences}} * (\text{talent} + \text{passion} + \text{experience})^2}$

## Llana

Indie pop, progressive and math rock band Llana consists of singer Celso, drummer Thomas, guitarist Ilja and bassist Joe. By now they know that their former teachers were right when they said that math would sooner or later catch up to them in life.

Llana was founded in 2022 and released their debut EP 'Traverse' in April 2023. The members' musical experiences span several continents and decades, enriching their sound by a multitude of layers. Live experience of the members ranges from playing in music festivals, live houses and bars, to touring across countries.
