

**LUCKY
SPADES**

TECHNICAL RIDER

Our band “Lucky Spades” consists of:

1. 1 Singer
2. 1 E-Guitarist
3. 1 E-Bassist
4. 1 Drummer

Extras:

1. 1 Cameraman (not on the stage)

Equipment that we have:

Equipment	Amount
Dynamic Microphone	2
E-guitar	1
E-bass	1
E-Drum Roland HD-1	1
Small mixer with 12 Inputs and 2 Outputs (6.3mm outputs)	1
6m TRS Audio Cables (6.3mm Jack)	2
3m TS Instrument Cables (6.3mm Jack)	5
6m XLR Microphone Cables	2

Equipment that we need from your team on the stage:

Equipment	Amount
PA-System (Loudspeakers and mixer)	1
Floor Monitors	1
Chairs (Minimum 1 chair for drummer)	1
Microphone+Microphone Stand	

Notes:

1. **PA system with a 6.3mm input and home mixer is very important to be provided on the stage.** Normally, our band would set up our sound by connecting all of our instruments (microphone, e-guitar, e-bass, e-drum, keyboard, etc) and our in-ear system to our small mixer by using XLR cables (for microphones) and TS instrument cables (for guitar, bass, e-drum, keyboard). Then we connect our 6.3mm outputs of the small mixer (left and right outputs) with a 6m TRS Cable to the home mixer. Then the home mixer will be then connected to the PA System.
2. **E-Guitar amplifier and E-Bass amplifier are not that necessary** but would be much better if they are there. But if we are using an E-Guitar Amplifier and E-Bass Amplifier, then the sound setup will be a little bit different. Because we need **DI Box-es** for both E-Guitar and E-Bass and **extra XLR Cables (minimum 2 XLR Cables)** to connect both of the DI Box-es to the mixer. **(This is not necessary if note number 1 is accomplished).**
3. **Drumset** will be much better if you can provide it for us. A real drumset will, of course, sound much better than an **E-drum**. But it is not necessary. If you cannot provide it, we are going to go with note **number 1**.
4. **Extra microphones and microphone stands** are not necessary but better if they are provided on the stage.
5. **Chairs** for our drummer ist **necessary**.
6. **Floor monitor** is necessary provided by the event organizer.
7. **Extra instrument cables and XLR cables** would be better too if provided by the event organizer.
8. If there are any sound technicians from your team with a better sound setup and better equipment setup, we will be very happy to follow their procedure.
9. If there are still some questions, please send us an email to: **luckyspades.official@yahoo.com**. We would be very happy to help, so that the performance can go smoothly and give a great atmosphere to the guests.

STAGE PLAN "LUCKY SPADES"
