Depending on the size of the venue and what has been discussed with the promoter/ venue official I might play solo or with a small band. These include a cello player and a backing vocalist. A local sound engineer that is familiar with the sound system of the venue must be provided for the night.

Equipment needed (solo):

- 1 dynamic microphone for the vocals
- 2 DI- boxes; one for the guitar and one for a stompbox
- 1 mic stand
- 1 chair on stage

Equipment needed (band):

- 2 dynamic microphones for the vocals
- 3 DI- boxes; guitar, stompbox and cello
- 2 mic stands
- 2 chairs on stage

Channel and monitor requirements:

- solo: 3 channels
- band: 5 channels
- 1 monitor mix and 1 wedge for both solo and band should be ok. We're happy either way

Thanks! We're really looking forward to working with you and have a great time at your venue!
