

TOMBSTONE – POINT OF NO RETURN

Bandinfo

The death-metal workers of *Tombstone* come from the western Ruhr area. One may well say that this is the ideal forge for their sound, marked by dirt, sweat, power and feeling.

What if the miner, who coined the image in the Ruhr area not so long ago, would have heard Metal? After a long hard day's work and 2-5 beer in his local pub around the corner, he surely would have been up for a few tombstone songs.

The band has been around since 2010 - the miner has disappeared from the scene. The feeling remains: Despite the changes, the Ruhr area and tombstone stands for honest guys and honest work.

Death Metal of different variants and with diverse influences has always played a role in the lives of these five musicians. They gained experience in various bands until life brought them together and the crucible emerged, that yields the first album "POINT OF NO RETURN" after the demo "Ignition" (2012).

Now it is paramount to pack the energy of this album and to bring Tombstone on stage - because this music is made for it!

Albuminfo

Tombstone are now at their personal "point of no return"! It is poured and cooled down! The shape is blown up, the cast piece of metal is quarried out! No turning back!

The nine songs offer melodic groove death paired with tons of heavy rock. Joy and fun to honest craft and the odd wink: no more, and no less is the specific claim.

Tombstone have won Patrick Wittstock of Azrael design over to the artwork, who showed enjoyment of the concept from the beginning. So it was also exactly created in the figurative sense, what constitutes the content.

Lifeblood, turned in the dirt of honest labor and grilled over an open flame!
Yummy!

Band: Tombstone

Album: point of no return

Release Date: 04.07.2014

EAN: 4011725503116
