

EVERFLOW

Everflow: Power-Prog – straightforward, powerful and uncompromising.

Founded in 1998, the band has gained lots of live experiences with well-known acts of the Metal-Genre – such as Rage, Subway to Sally, Lefay or Angel Dust and Metalium. Up to now the band is constantly performing at Festivals, Tour-Supports or local shows.

Their EP *Different Views*, which was released in 2007 on Yonah Records, proves the unorthodox character of the band. With a mixture of Rock and Metal, combined with elements of Progressive Music, Everflow unite styles and sub-genres, without losing their focus on being straight forward.

Their new record – entitled *Fraud* – will be a concept album inspired by the life and death of the fairly unknown 20th century poet Moses Adam Fraud who arouse some attention in the winter of 1999 when he finally shot himself to death after attempting to shoot at civilians from the top of his New Orleans family home.

The album deals with certain prominent issues of Fraud's life and work, including the impulse manslaughter of his teenage girlfriend and later wife Elina Fraud as well as an interpretation of his poetry and philosophy.

Musically the record will be far more intense and aggressive than the band's past work, since Fraud's life evokes a sad and sinister story with many gloomy and depressing anecdotes that don't leave much space for a more bright or hilarious atmosphere.

The album comes with 9 tracks that are divided in 3 chapters. Besides the already released tracks *Proteus* and *The Escapist* the record features 7 entirely new tracks plus an instrumental introduction to the life and death of Fraud.
