Releases: Anatomy of Anxiety (July 2022, Independent)
Death obsessed (Spring 2024, Independent)

About:

HUMAN ABYSS is an atmospheric death metal band with black metal elements founded in Berlin 2019. HUMAN ABYSS is probably the first interfronted death metal band out there.

Due to the pandemic it was difficult as a newcomer to play many shows. Still the band managed to stick to their vision, released their first album, played few shows with bands like Bipolar Architecture.

End of summer 2021 the line up was reinforced by berliner old school death metal veterans Olli (rythm guitar) and No (drums) of SPAWN, what brought quite a shift to the band's style towards death metal.

For the upcoming studio album "Death obsessed" HUMAN ABYSS teamed up with the amazing Producer Kai Stahlenberg of the legendary Kohlekeller Studio. The fantastic Britta Görtz (Cripper, Critical Mess, Hiraes) collaborates on the first single "Cut". "Death Obsessed" will be released in spring 2024.
