„Until you like the blue“ - Indie? Pop? Electro? Alternative? Experimental? Progressive? Soundtrack?

Distinct, unconventional, free-spirited but catchy for all that! Three musicians, producers, personalities creating unique emotional images of themselves. The music is experimental, dynamic and unbelievably atmospheric. For some people it's "Progressive Pop", for others it's "Experimental Indie" and for most people it's probably something in between.

They name their influences as Björk, Eminem, Metallica, Miles Davis, David Lynch, Tone, Arnold Schönberg, Die Ärzte, Radiohead, Chet Baker, Lars von Trier, Claude Debussy, Pat Metheny, Muse, Moby, Tua, Iron Maiden, Alban Berg, Depeche Mode, Helmet, Igor Strawinsky or Tool and this list in itself is remarkable and bewildering.

„...this is real good...like it!!! who are these three?“ they say and a huge number of unbelievable responses is reaching the guys from Hamburg. You can download the complete LP at [SoundCloud](https://www.soundcloud.com/notionsoundcollective) and use it as a soundtrack, background music or whatever - and it all comes for free!
