Vermilion - The color of fire and passion and a name that speaks for itself. Driven by the enthusiasm to create a own passionate and energetic sound transferring their emotions, Konsti, Steve, Kevin and Sebby created their very own, individual style, which is very puristic but still atmospheric. Two guitars, bass guitar, drums and two vocalists - all they need to take over the stage. Their lyrics tell stories about embracing yourself and overcoming your fears, but also to stand up and speak up for what you believe in. With new songs and the right mindset Vermilion can't wait to spread their message to the world
