## Short description

Narrative, theatrical, groovy - that's Rise in Chains

Rise in Chains want to redefine the term »theatrical« for rock concerts. We do not just play our songs - we tell a story in our own way.

With metal riffs and guitar sounds, paired with a rock voice, we want to go our own musical way and at the same time carry the audience along.

"Rise in Chains" stands for entertainment that wants to captivate and entertain - with hard riffs and burning passion.

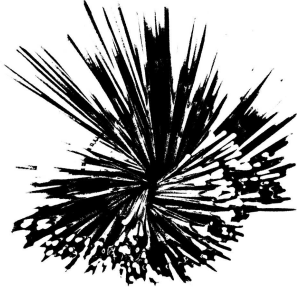

## Bandmembers

Jäff Roxx – Vocals  
DavidKrad – Guitar  
Red – Bass  
Jason Horn – Drums

## Diskographie:

### FROM BOTTOM RISE IN CHAINS

From Bottom (EP)	Insight Me
The first release of Rise in Chains should already indicate in the title that their musical journey is just beginning. The songs represent the band's entire musical spectrum to that time, ranging from a tribute to classic rock 'n' roll to modern metal. In terms of content, the songs move between relationships, bonds and decisions that a human being can make and thus round off the theme of a (new) beginning.	The debut album of the band was inspired by classical literature - mainly from the horror genre. The lyrics deal mainly with psychological problems of the characters that inspired them. Musically, Rise in Chains has evolved. Groovy rhythms have been added to the catchy guitar riffs and the rock tube, creating a tension with the profound lyrics that is audible.
